Is this trail for you?

The Tonquin Valley is one of Canada's premiere backcountry destinations, with impressive peaks, glaciers and scenic lakes. It's also known for its variety of wildlife, which includes grizzly bears, black bears and caribou. The area has a reputation for muddiness and an abundance of mosquitoes. Late summer and fall are the best times to enjoy this trail. Seven campgrounds, and an Alpine Club of Canada hut can be booked ahead for accommodation.

The details

The valley is popular for its stunning views of Amethyst Lake at the base of The Ramparts mountain range. The trail is horseshoe-shaped, with access to the valley from two trailheads. You may wish to arrange transportation so that you can hike in from one trailhead and out to the other. Travelling in from the Astoria trailhead has less elevation and quicker access to the campgrounds on the south end of Amethyst Lake. Starting from the Maccarib trailhead is generally considered more scenic. For hikers without transportation, the Astoria (#42) – Switchback (#43) – Clitheroe (#44) – Surprise Point (#45) and out via Chrome Lake loop is a good option, though not as well maintained. Day trips into the Eremite Valley and to Moat Lake are great for those with some extra time.

An area closure is in effect for the Tonquin valley from November 1 through May 15 for caribou conservation.
