

FireSmart™ Project Description

Please complete the form in as much detail as is currently available to facilitate an efficient review of your project proposal. Figures, maps and photos describing the project location and activities help clarify the project scope and are encouraged.

This form should be considered an iterative, living document. The "Initial Submission" version provided is understood to be based on estimations, considered the best available information at the time of completion, may be incomplete, and subject to change in future iterations of this document. Comprehensive information may or may not be known at the time of the Initial Submission, and that is ok. Early engagement is more important than having complete information.

Summary of the Project

This section should summarize **How** the project is being undertaken?

- Where is the project located?
- What type of vegetation will be removed? Please indicate your vegetation removal prescription for various zones (Parks Canada recommends following FireSmart™ Canada: Immediate Zone (0-1.5m) removal of all combustibles; Intermediate Zone (1.5-10m) removal of all conifers; Extended Zone (10-

30m+): pruning mature conifers to a height of 2m and thinning all conifers to achieve a crown spacing distance of 3-5m.

- How will vegetation be cut? (e.g. hand cutting with chainsaws/hand tools, mechanical equipment)
- How will cut vegetation be disposed of? (e.g. burn piles, chipping, haul away)
- Who will conduct the tree removal? (e.g. home/business owner, FireSmart contractor, arborist)
- When is the project scheduled to be undertaken? Will trees be removed during the bird nesting/bat window mid-April to the end of August? If so, who will conduct the bird nest/bat sweep?
- Is the project area within 30m of a Riparian feature (river, lake, wetland)? If so, is FireSmart™ being proposed within the Riparian Zone, and is there an adapted FireSmart prescription?

Project Plans, Drawings, Maps

I have attached preliminary site plan(s) map and/or conceptual drawing(s) with this form. Photographs of the site may also be attached.

Estimated Project footprint (m ²)	Location of proposed tree removal
Site History (e.g. previous use, known site sensitivities, contamination, buried tanks, lines, cables etc.)	

Project Activities

Physical Activities	YES	NO	TBD	Project Phase(s)	Type of Equipment	Work in or within 30 m of waterbody	Duration of disturbance	Brief description of the activity
