

AIS monitoring 2025

at Riding Mountain National Park

AIS prevention program goals

Prevent spread of zebra mussels to new waters

Prevent other AIS from arriving in park waters

quagga mussels

spiny water flea

black algae

rusty crayfish

Eurasian water milfoil

Clear Lake

Zebra mussels are **reproducing**, with **settlement and growth** on docks in the eastern part of the lake.

- Adult
- Juvenile
- Veliger
- ★ Monitoring location where no zebra mussels were found

The protection of Clear Lake and its ecosystem remains our top priority.

AIS monitoring

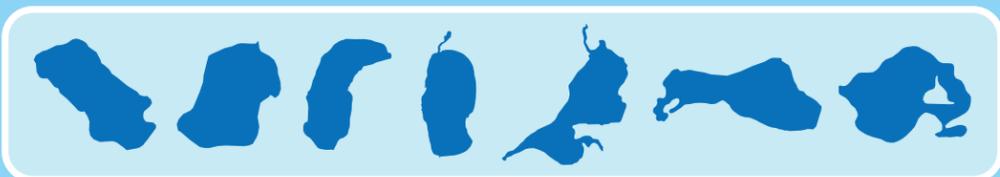

Clear Lake monitoring

- for new aquatic invasive species
- tracking the number and spread of zebra mussels

Monitoring in other lakes

- **no evidence of zebra mussels** in Katherine, Grayling, Moon, Audy, Whirlpool, Bob Hill or Deep Lakes

Clear Lake timeline
