

# Where We Are Now

We have confirmed the presence of zebra mussels. We are now looking for an established population somewhere in Clear Lake.

## Zebra Mussels at Boat Cove

Zebra mussels retrieved from Boat Cove on Nov. 10, confirming their presence in Clear Lake.

Separated zebra mussels from Boat Cove, grown to 1-3 cm in size.

## Spread in Manitoba

## Establishment Graph

## What are We Doing Now?

We are working with the Coalition of First Nations with Interest in Riding Mountain National Park, Fisheries and Oceans Canada, the Province of Manitoba and other specialists from Parks Canada.

Work is underway to confirm if there is an established population in Clear Lake. This knowledge will inform our next steps.

The absence of evidence does not mean the absence of zebra mussels. In other words, just because we have not yet found them anywhere else, does not mean they are not here.
