

Photo Scavenger Hunt

Rouge National Urban Park is home to amazing and rich biodiversity. Over 1,700 species call this park their home, including more than 1,000 plant species, 247 bird species, 73 fish species, 44 mammal species, and 27 reptile and amphibian species.

How do you think your backyard compares to Rouge National Urban Park? Grab your camera or smartphone and collect a visual record of your time spent in nature by searching high and low for unique species in your own community.

Can you find...

A tree that has large flat leaves

A furry four-legged animal

An animal that carries its home on its back

An animal that is smooth and silky

An animal that has wings and can fly

A tree with needles and cones

An insect that carries pollen

A fungus with a cap and stem

A plant that blooms beautiful colours

A seed which a new plant can grow from
